

Perhaps can you walk through an example of paying a person to help carry out the grant, which then can be considered as matching funds in the budget?

Keep in mind this is not a reimbursement. Any work done on the LOI, application, etc can not be applied towards the in-kind funds. Any work thereafter - ex. interm report, grant administration - can be considered.

Can 2 people work on an application? Do they need to share a login?

Yes, any organization can have multiple profiles/logins that will allow staff, board, etc. to access the application and other documents.
