To make the most of your time on Cycle the Erie Canal, it is important for you to prepare yourself and your bike. This way you can enjoy yourself on the tour and have the energy you need to meet your fellow cyclists and visit some of the communities and historic sites along the route.

GETTING FIT
There is no substitute for miles and minutes spent riding your bicycle prior to Cycle the Erie Canal. If you could take the time to ride 400 miles or more before the bike tour, you would be in excellent shape to ride each day. However, some training is better than none. Set a reasonable goal given your schedule, and stick to it. Your work will pay off. Try working some organized rides into your schedule and consider joining your local bicycling club. You'll meet great people who can help you train and give you tips for the tour.

BASIC TRAINING SCHEDULE
The plan here is simple – start with 5-mile bike rides. Begin with a few 5-mile rides as soon as possible. If it is too cold where you live, consider a spin class or using a trainer indoors. Short rides will help you build your endurance gradually. The trick is, once you are used to riding 5 miles, add another 5 miles to the ride. Do these 10-mile rides until you feel comfortable adding on 5 more miles. Soon, you should be able to put together four or five 5-mile rides, and do 20 or 25 miles at a time. When you are ready, move up to 30-35 mile rides. Then, before the bike tour, do at least two 40-60 mile rides like you would on Cycle the Erie Canal. This means stopping often, doing some sightseeing, and trying to pace yourself so that you have enough energy to enjoy the rest of your day.

CHILDREN NEED TO TRAIN, TOO
Cycle the Erie Canal is a very family-friendly ride, but it is especially important for families with children to spend the time beforehand to help them get ready. Practice helps children ride confidently in a straight line and obey traffic laws, important safety skills on the road or trail. If you plan to bring your child in a trailer, this is the time to find out if this is a good fit.

STRETCH
As you are training, remember to stretch you major muscle groups, not just your legs. Stretching is essential to injury prevention and muscle recovery.

STAY HYDRATED
It is important to drink water before, during, and after cycling, even if you're not thirsty. This rule applies no matter what the weather is like. When you bicycle, you create a 10-20 mile-per-hour wind across your skin that dries sweat almost immediately. This fools some riders into believing they aren't sweating, and therefore they don't drink the water their bodies need.

So what happens if you get dehydrated? The worst is heat exhaustion, followed by a heat stroke. More often though, riders pedal on, wondering why they feel terrible and why biking seems so hard. If they would just stop to drink water, they would be amazed at how much better they would feel!

EAT WELL
One mistake riders make while cycling is under-eating, or eating at the wrong times. On the tour, you will burn up 10,000 or more calories. If you don't eat breakfast, or if you skip lunch, eventually your body will run out of its glycogen reserves and be unable to maintain a stable blood sugar level. When your body's glycogen reserves are depleted, you suffer what is known as “bonking.” “Bonking” can easily be prevented by consuming adequate...
carbohydrates before the ride. However, if you do “bonk,” eating simple sugars will quickly get your blood sugar levels back to normal, and eating carbohydrates while riding will keep them stable.

YOUR BICYCLE
We recommend you bring a bike that is in good mechanical condition and that is comfortable to ride. Be aware of how well your bike is functioning during your practice rides and how you feel riding it. You may need to visit your local bike shop to make adjustments.

Most Cycle the Erie Canal riders use hybrid bikes because of their comfort and versatility, but touring bikes, cyclocross bikes, and gravel grinders are also good options. Tandems, recumbents, and trikes are welcome.

Keep in mind that you will be riding 40-60 miles per day, both on stone dust and paved surfaces, so it is important to think about your tires. We recommend tires with puncture protection, 28-42mm wide for 700c wheels and 1.3-1.6” wide for 26” wheels. If you ride a road bike, we suggest the widest tires the frame will accommodate for a smooth ride. For mountain bikes, we suggest non-aggressive tires or “slicks” to reduce rolling resistance. Trike riders should know that small portions of the Erie Canalway Trail are single track. If you have questions about your tires, ask at your local bike shop.

For information on shipping a bike or renting a bike, see pages 13-14.

BICYCLE ACCESSORIES
The most important accessory is a good helmet. You must wear a helmet on Cycle the Erie Canal. Find one that fits and that passes CPSC (Consumer Product Safety Commission) standards.

If you don’t already have one, we recommend you install a bike computer. While daily routes are marked, it can be helpful to have distance information to follow along with the cue sheet. If you have a handlebar map holder, you can refer to your cue sheet while riding and won’t have to stop to know which way to go.

Other things we suggest you carry on your bike are a cycling-specific multi-tool, mini pump, patch kit, tire levers, and most importantly, a pair of spare tubes. You may also choose to have front and rear lights for when visibility is low, or if you’d like to ride in the evening. If you don’t know how to replace a flat, you shouldn’t be embarrassed. Stop by your local bike shop when they aren't busy, and they will probably be happy to show you, or ask the bike club in your town for assistance. A number of online resources are also available. And, of course, there will be plenty of other cyclists on the tour who can help you, as well as bicycle and vehicle SAG support. There will also be a “How to Change a Flat” workshop provided during the tour.

You'll need a place to carry these repair items, along with money, sunglasses, sunblock, and snacks, so think about bringing a bag. A handlebar bag, seat bag, saddle bag, rear rack bag, or pannier on your bicycle is best, but a belt bag, fanny pack, messenger bag, or backpack are also options. Remember that you won't be able to access your luggage until you've reached that day's destination, so you may also need to bring rain gear or a windbreaker. You should also bring a bike lock for when you stop in communities along the route and for the evenings.

All riders receive a Cycle the Erie Canal water bottle, but you'll need water bottle cages on your bike and an extra water bottle or CamelBak. Nothing will stop you in your tracks on a bike faster than dehydration.

BICYCLE CLOTHING
For a week, the entire weight of your body is going to be on the three places where your body meets your bike: your hands, rear, and feet. The clothing you choose can make a huge difference in how you feel. We recommend bicycle gloves, bicycle shorts, and shoes that you find comfortable both on and off your bike.

Bicycle gloves improve grip, reduce pressure on your hands, dampen shock, and provide crucial protection against road rash in the event of an accident.
Bicycle shorts allow perspiration to dry quickly, protect the skin against repetitive friction, and have a sewn-in pad for comfort. If tight bike shorts are not your style, consider mountain or touring shorts. These have the appearance of normal shorts, but are also constructed with extra padding in the seat. Regardless of the shorts you use, applying chamois cream before riding can be helpful to prevent chafing and rashes.

Shoes for cycling come in many shapes and styles, from sneakers to shoes designed for clipless pedals. If you decide to use cycling shoes with clipless pedals, mountain or touring shoes with recessed cleats will be better for all the sightseeing you will do off your bike.

You can cycle in most any shirt on a dry summer day, but in cool or damp weather, some materials have a clear advantage. Synthetic materials will keep you dry and warm even when it's wet and cold outside. Consider pre-ordering an official Cycle the Erie Canal jersey on page 24.

WEATHER
Weather in Upstate New York during July tends to be moderately hot and humid. Average highs are between 80° and 83° and average lows between 58° and 62°. Keep a windbreaker, rain jacket, or poncho with you for a possible rain shower.

EMERGENCY ALERTS - SIGN UP NOW
We strongly suggest you keep up to date with any emergency route changes, trail condition reports, or severe weather updates, by signing up for our Emergency Alert System, Rained Out. To sign up, text CTEC2019 to 84483.

Cycle the Erie Canal is a fully-supported bike tour. Fully-supported means we carry your gear, routes are marked, two rest stops are stocked each day with drinks and snacks, and a team of cyclists and vehicles provides support along the way! All you have you do is ride 40-60 miles a day, make new friends, and discover the Erie Canal!

CAMPING ACCOMMODATIONS
The choice is yours: bring your own tent, hire Comfy Campers and have one set up for you (see page 21), or stay at hotels and bed & breakfasts (see page 17-19). Cycle the Erie Canal includes camping accommodations at schools and parks across Canalway Trail corridor with restrooms and shower facilities. We’ll also have a shower truck and portable toilets. Indoor camping is available each night. Please be aware that the spaces are not air conditioned and spots may be limited. Typical indoor camping locations include gyms, meeting rooms and ice rinks (without ice).

MEALS
Cycle the Erie Canal includes 8 breakfasts and 6 dinners. Breakfast is served each day from 6:00 to 8:00am. Dinner is served from 5:00 to 7:00pm. Lunch is on your own each day in communities along the trail, as is dinner in Seneca Falls on Tuesday night and in Rome on Thursday night.

BAGGAGE TRANSPORT
Luggage trucks are open from 6:00 to 8:00am each morning for you to load your bags. Your bags will be waiting for you at the end of the day’s ride.
MARKED ROUTES, CUE SHEETS, & MORNING BRIEFINGS
The Cycle the Erie Canal route is marked with paint and cue sheets are provided each evening with turn-by-turn directions for the next day's route. Twice at breakfast each morning, at 6:30 and 7:00am, Cycle the Erie Canal volunteers and staff brief riders on the day's route, tour opportunities, and special events. Riders leave on their own each morning and ride at their own pace.

REST STOPS
Morning rest stops, located 15-20 miles from the start of the ride, will be open from 8:00-11:00am. Afternoon rest stops, located 15-20 miles before the overnight location, will be open from 11:00am-4:00pm. Rest stops are stocked with complimentary fruit, snacks, and beverages. In an effort to reduce waste we will not offer cups at rest stops, so please be prepared to use your water bottles.

BIKE REPAIR
Kingsbury's Cyclery of Elmira, NY will be accompanying Cycle the Erie Canal, stationed at each rest stop and overnight location, providing bike repair and selling parts and accessories. Kingsbury's Cyclery sells Co-Motion, Giant, Surly, and Trek bikes, so if you are looking for a new bike for Cycle the Erie Canal, call or email Paul Kingsbury at 607-733-3465 or kcyclery@gmail.com.

SAG SUPPORT
A team of bicycle and vehicle SAGs follow the route each day and are available for help if you have a problem. Call the Assistant Bike Tour Director if you need assistance. Telephone number will be provided on the cue sheets which are available daily. If you don't have a cell phone, ask another rider or volunteer.

DEVICE CHARGING
All tent cities will have limited access to device charging stations. While we cannot guarantee that you'll be able to charge your phone every day, it’s likely you’ll be able to recharge several times throughout the week.

MEDICAL SERVICES
In addition to the team of bicycle and vehicle SAGs along the route each day, a medical professional will accompany Cycle the Erie Canal, holding office hours each evening.

SAFE CYCLING
Communication and predictability are key to safe cycling. Follow the rules of the road and obey stop signs and traffic lights. If riding in front, warn cyclists behind you of potholes, broken glass, or other dangers. If riding in back, alert cyclists ahead of you of cars coming from behind. If you’d like to pass someone, let them know you are passing by saying clearly, “on your left.” Use hand signals to indicate turns and stops, and never stop suddenly in the middle of a road shoulder or trail. It’s easy to let your guard down after you've been cycling on a traffic-free trail for miles. Use caution at road crossings and while riding on roads between sections of trail.

BIKE CLINICS
Learn all about bike maintenance at evening clinics along the ride.

MASSAGE THERAPY
A team of massage therapists will be available by appointment each evening. There is an additional cost for this and may require cash payment.

WHAT IF I DON’T WANT TO CAMP?

If you’d rather not bring your own tent or hire Comfy Campers, you can make your own arrangements to stay at hotels and bed & breakfasts. Here are some accommodations along the route, most within a short ride from the tent cities. Make your reservations early as many places will fill up quickly. Keep in mind that you will be responsible for transportation to and from each overnight location. An easy way to do this is to leave most of your gear on our luggage truck and bike to your hotel or bed & breakfast and take only what you need for the night.

**SOCIAL MEDIA ON THE TOUR**

During the tour we are encouraging riders and ride supporters to post ride updates and images to their social media networks and to include the **#CycleTheErie** hashtag to help share your story with an audience beyond your social media followers.

For the uninitiated, a hashtag is word or phrase proceeded by a hash mark (#) and is used within a message to identify a keyword or topic of interest and facilitate a search for it. In our case, it’s the Cycle the Erie Canal bike tour. Using a hashtag in a social post is as simple as adding the ‘#’ sign before a single word or phrase *without spaces or punctuation* (numbers are okay), for example, **#CycleTheErie**. Whenever a user adds a hashtag to their post, it is immediately indexed by the social network and searchable by other users. Once someone clicks on that hashtag, they’ll be brought to a page that aggregates all of the posts with the same hashtagged keyword in real-time.

You can also “tag” Parks & Trails New York and the Erie Canalway Trail in your updates by adding the following names before you send your post. Tags allow us to share your photos and memories to all of our followers!

- **Instagram** @parkstrailsny
- **Facebook** @parksandtrailsny @eriecanalwaytrail
- **Twitter** @PTNY @cycletheerie
